

<u>WARNING:</u> Leadership as a Domain (LAAD) is a hard-hitting, no-holds-barred, program of workshops, keynote addresses and coaching for teams, leaders and mentors committed to building a *culture of Leadership Readiness*.

## <u>WHY</u>

Understanding and mastering the *Leadership Domain* is critical to organizational success and requires a system that accelerates and builds a culture of Leadership Readiness

## **HOW**

Our systematic approach to building LAAD includes presentations, workshops and group/individual coaching that provides your team with a cycle of developmental growth that is self-sustaining and tailorable to accommodate any schedule. LAAD workshops and instruction are based on understanding three pillars:

- 1) Develop Organizational Trust
- 2) Cultivate Healthy Feedback
- 3) Coaching For Succession

Implementation and continual practice of these pillars will unlock your organization's full potential. Your leaders will grasp how to optimize their strengths and fortify the areas to accelerate Leadership Readiness culture.

## **WHAT**

RCCG will share practical experiences and a custom framework allowing your leaders to dominate the Leadership Domain. Your leaders will learn how to connect with, inspire, motivate and coach teams toward mission accomplishment.

Following the workshop, RCCG offers 6-months of tailored developmental coaching that includes scheduled sessions as well as "on-call" telephone/video meetings to propel your leaders to rise above leadership challenges. We will partner to identify the root cause and contributing factors of leadership development challenges and discover the optimal leadership performance path for your team.

Our program is about dominating the Leadership Domain and accelerating leadership readiness.

RCCG looks forward to bringing our leadership coaching and development experiences directly into your organization. RCCG is excited for you to discover the undeniable impact an exceptional leadership development program will have on your organization.
